

ToughEye-1700™ Video Backup Tool

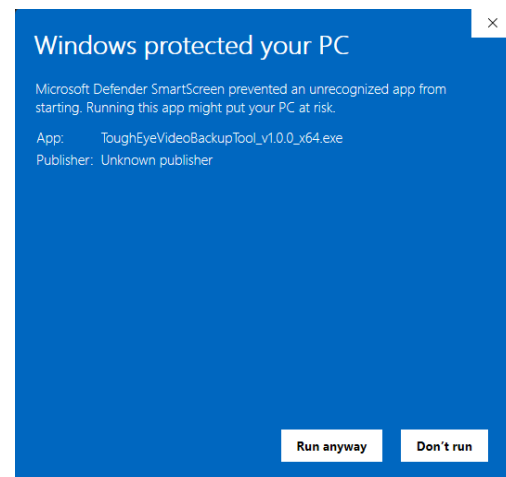

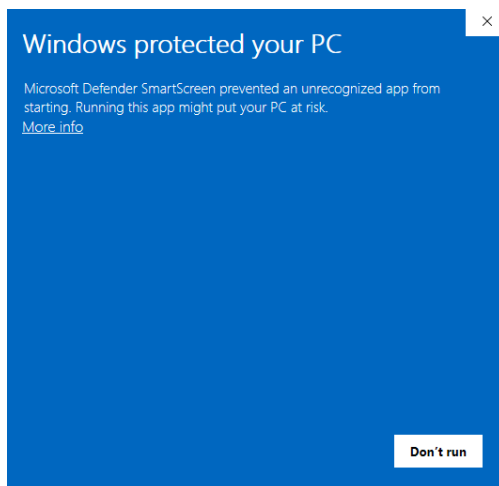

User Manual

Version 1.0

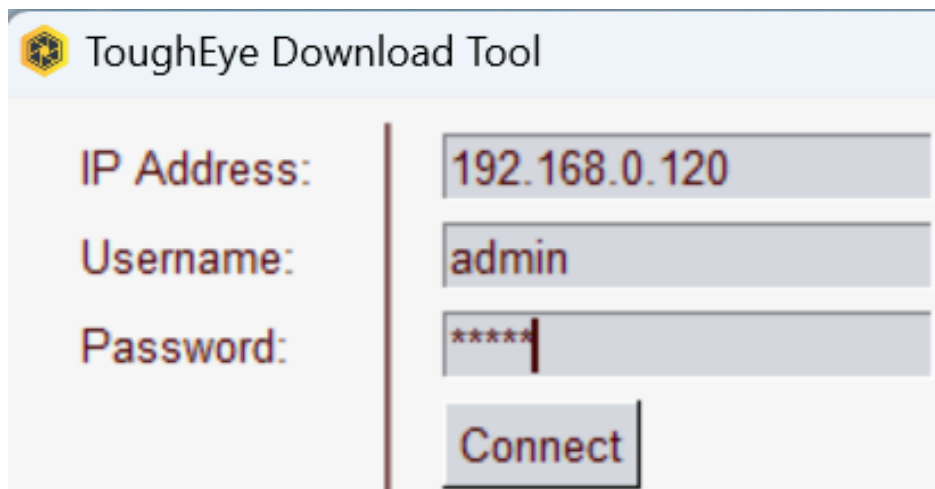

Date: 2022.11.22

This is a step-by-step guide to downloading records from a ToughEye-1700™ camera locally onto a computer.

1. Ensure the unit is powered and accessible on the network
2. Run the ToughEyeVideoBackupTool. If you see this error message appear, click 'More info', then click 'Run anyway' to launch the program

3. Enter the camera information here, then click 'Connect'. Default credentials are:
IP Address: 192.168.0.120
Username: admin
Password: admin

A screenshot of the "ToughEye Download Tool" application window. The title bar says "ToughEye Download Tool". The interface has a light blue header and a white body. On the left, there are labels for "IP Address:", "Username:", and "Password:". To the right of these labels are input fields. The "IP Address" field contains "192.168.0.120". The "Username" field contains "admin". The "Password" field contains "*****". Below the input fields is a button labeled "Connect".

- Select a date range to find recordings for

Start date:
 End date:

- Click 'Find Records' to search the date range

Find Records

- Select the preferred record for downloading and choose a folder for it to be downloaded to
